Thanks Dante!

I will recommend to Ginny that we respond to the comments, some might be helpful. I am not sure they realize that the QAPP is for multiple programs and as such, some of the comments are for limits that are not applicable. However, peer review is always a good thing and nothing in their comments appears to change the DQO's so the minor changes that may occur will not require resubmission to EPA QA/QC.

It is important to keep in mind that even if their assumptions, now premature, prove viable then the samples we are taking will represent background. Something that is still needed.

On a related note, do you have time today to discuss how to approach radionuclides? We need to decide if we should approach NAREL about the samples.

Wabuska Drain and the Tribal wetlands both have water in them right now. It may be due to a recharge program (not water flowing from the site) but a great opportunity to get data on what is in the system. We are cleared to send the samples to Richmond today.

Subject: ARC comments on YPT QAPP

Dante,

Atlantic Richfield has reviewed the Quality Assurance Project Plan for Wabuska Drain that was prepared by the Yerington Paiute Tribe. Attached is our response letter and list of comments. We appreciate the opportunity to review this document and look forward to discussing it further. If other work plans are prepared relating to OU-7, we would appreciate having the chance to review them as well.
